Nulife Triple Safety Primo Latex Surgical Gloves (Sterile, Powder-free)

Product Information

Nulife Triple Safety Primo Latex Surgical Gloves (Sterile, Powder-free) are designed to be perfectly anatomical for a comfortable and wrinkle-free fitting. The extremely soft rubber reduces finger fatigue and increases efficiency.

The special rubber film used in every pair of the gloves adds sensitivity while providing complete protection to the hand.

Apart from the ergonomic features, our stringent quality control measures make it the safest protective handwear for surgeons.

Our powder-free gloves help prevent the powder from entering the patient's body during surgery. This further prevents any chances of inflammation, fibrous bands and post-operative adhesions.

We have also customised the latex formulation to enhance doctor comfort.

Special Features

- Ideal for doctors and surgeons in invasive surgery
- Micro-textured finish to provide superior grip
- Reinforced cuff area to prevent tearing while wearing
